Projects

Algorithm Trader

| Website - <https://github.com/ahmedareeb3/Stock-Analysis>

- Built a stock-trading tool in Python for stock analysis and visualization.
- Leveraged pandas and matplotlib libraries to process and visualize large datasets.
- Implemented data cleaning, transformation and statistical analysis functionalities

Voice Assistant

| Website - <https://github.com/ahmedareeb3/Personal-Assistant>

- Developed a Voice Assistant application using Python, incorporating speech recognition and natural language processing techniques.
- Implemented speech recognition libraries such as SpeechRecognition for converting spoken words into text.
- Integrated text-to-speech libraries such as pyttsx3 for converting text responses into speech.
- Integrated external APIs to fetch data, such as weather information or search results.

Portfolio Website

| Website - <https://ahmedareeb3.github.io>

- Developed a professional portfolio website to showcase skills, projects, and achievements.
- Implemented a responsive design using HTML5, CSS3, and JavaScript.
- Designed a visually appealing layout with appropriate colour schemes and typography.
- Ensured user-friendly navigation with intuitive menus and clear labels.
